

# USER MANUAL

K5540

## Precautions

1. Please read this manual carefully before using, and keep it well for future reference.
2. Before cleaning the tablet please unplug the power cord and wipe with a soft damp cloth, do not use any kind of detergents.
3. Don't expose this product to water or other liquids. Take care to never spill liquids onto the tablet and pen. Exposing this product to water or other liquids may cause product malfunction or electrical shock.
4. Do not place the tablet on where is unstable or a height for children reaching easily in order to avoid danger. Prevent children from swallowing the pen nib or side switch. The pen nib, side switch, or other movable parts may accidentally be pulled out if children are biting on them.
5. Power off your tablet in locations where/when electronic devices is not allowed. Because the tablet may cause other electronic devices to malfunction in some locations where/when the use of electronic devices is not allowed, such as within an airplane, be sure to turn off the tablet.
6. Do not disassemble the tablet and pen. Do not disassemble or otherwise modify the tablet or pen. Such action may cause heat generation, ignition, electronic shock, or other damage, including human injury. Disassembling the product will void your warranty.
7. While getting the components replaced, you are supposed to guarantee that the repairman is using the substitute components specified by the manufacturer. Unauthorized component replacement might cause fire, electric shocks or other dangers.
8. Do not insert foreign material into the USB port or any other opening of this product. If a metal object or foreign material is inserted into a port or other opening of this product it may cause the product to malfunction or burn out, or cause electronic shock.

- 1) Use the pen nib clip to pull the old nib straight out of the pen. (①②)
- 2) Insert a new pen nib into the stylus and push the nib until it stops. (③④)

## 2.Function Setting

### 2.1 Control Interface Overview

When you double click the driver tablet icon (  ) which normally appears in the system tray at the corner of the screen, you will see the control panel (pictured above). It will display driven-related information.

Controlling the panel by digital graphic tablet can set up functions for the button of the digital pressure-sensitive pen, regulate the pen ' s pressure sensitivity and modify the workspace and shortcut keys.

### 2.2 Pen Pressure Test

Click Pen Pressure Test into Pressure Sensitivity Testing

### 2.3 Pen Button Settings

Below the key menu shows the defining keys of the digital pressure sensitive pen. Selecting its “left, middle, right, keyboard keys, no keys, change brush, switch screen” on the corresponding right drop-down menu of the pen function settings windows “the first button, the second button” can achieve its functions.

When finished the first key and the second key selecting the keyboard keys, all the other keys can be freely defined.

When this done, you can achieve all the shortcuts keys functions of the graphic software.

Digital pressure sensitive pen default setting functions:

- 1.The pen nib is equivalent to the mouse left button function.
- 2.When the first key is E, you can switch it to eraser in the graphic software(such as photoshop etc).
- 3.The second key is equivalent to the mouse right function

## 2.4 Working Area Setting

The work area can be changed by user

## 2.5 Pressure Sensitivity Setting

Pressure sensitivity: move the slider from left to right, it can be used to adjust the sensitivity of the tip and the severity of the stroke when drawing, which affects the change of the handwriting(red box area).

When your computer is connected with two screens and use the extended mode, you can choose the corresponding work area of the graphic tablet in the setup screen area(green box area).

## 4. Trouble Shooting

Abnormal Phenomena	Possible Solutions
There is no pressure in the graphics software but the cursor moves	You may have installed other tablet drivers or opened the drawing software when installing the driver. Please uninstall all drivers and close the drawing software, then re-install the driver. It's better to restart your computer after finishing the installation.
The pen does not work	<ol style="list-style-type: none"> <li>1. Make sure you put an AAA battery inside the pen and press the button on the top of the pen to turn it on.</li> <li>2. Make sure you installed the driver correctly.</li> </ol>
The computer can't enter sleep mode	When you are not using the tablet, please do not keep the pen turn on and put it on the tablet surface (please press the button on the top of the pen to turn it off), which will keep the computer awake.
The side button of the pen doesn't work	When pressing the side button, please make sure that the nib didn't touch the tablet surface and the distance between the nib and surface is less than 10mm.
The computer can't recognize the tablet	Make sure the USB port is functional, if not, please change to another USB port.
